

Stingless Yet Super:
**The Unique Sweet &
Tangy Kelulut Honey**

The Uniqueness of Stingless Bee

Stingless Bee honey or Kelulut honey is considered to be the most nutritious honey. It was recognised as Malaysia's first Superfood by Malaysian Agricultural Research and Development Institute (MARDI) in 2016.

Stingless Bee — also known as the tribe Meliponini, is the largest group of eusocial bees on earth, and have been around longer than regular honey bees. Generally harmless to humans, they keep their honey in storage pots built from cerumen — which is made of wax secreted from the glands on the abdomen of worker bees, combined with propolis which is derived from resins collected from plants.

Unlike regular honey bees that keep their collected honey in hexagon combs made of wax alone and not affected by propolis during storage, the stingless bee honey stored in this pot is infused by the healing properties of propolis.

The honey tastes very unique, sweet and tangy, as well as full of wonderful benefits.

(The) abundant of trehalulose in stingless bee honey is concrete evidence that supports some of the reported health attributes of this product and it also shows that this honey has low glycemic index and its helps keep blood sugar level stable

Stingless bee honey offers more antioxidant and inflammation reduction properties than honey produced from stinging bees.

A Natural Wonder for Wholesome Wellness

Contains Trehalulose

A sugar with low glycemic index (GI) that does not cause a spike in blood glucose

Full of nutrients

Contains protein, amino acids, glucose, Vitamins A, B, C D, and E and minerals

With medicinal properties

Higher in antimicrobial activities, and has restorative properties

Antibacterial

Also antiseptic, antifungal, and antiviral

Unique taste

Sweet and tangy

Improve Health

Overcome conditions such as diabetes, asthma, arthritis, high blood pressure, and improve immunity

Ethically Farmed

Collected from farms located near natural forests, far from towns and cities, landfills, or other non-organic farms

No Chemicals

Stingless bees are less susceptible to diseases and pest, so no antibiotics or miticides are used

Verified by Malaysia Book of Records

The first stingless bee honey to withstand the sub-zero temperatures of Mount Everest

Laboratory tested

By ISO- certified lab (each production batch)

Endorsed by Malaysia Tourism Board

As well as by Ministry of Agriculture & Agro-based Industry

Highest quality

Meets all parameters set by Japan Food & Regulation Laboratory

Championing Communities

We ensure our farms do not harm surrounding communities and environments. We also create jobs for low-income locals, we support local businesses and we preserve local culture in the Malaysians states of Kedah and Sarawak

Range Of Our Honey Products

700G STINGLESS BEE HONEY

Ingredient :
700g of pure Stingless bee honey
Carton/Packaging: 700gm x 9 bottles
Size/carton: 31 x 24 x 34 cm
Weight/Carton: 12.6 kg

100G STINGLESS BEE HONEY

Ingredient :
100g of pure Stingless bee honey
Carton/Packaging: 100gm x 36 bottles
Size/carton: 36.3 x 21.4 x 18.8 cm
Weight/Carton: 8.52 kg

30 SACHET STINGLESS BEE HONEY

Ingredient :
100g of pure Stingless bee honey
Carton/Packaging:
30sachet x 24 boxes
Size/carton: 31 x 24 x 34 cm
Weight/Carton: 9.5 kg
